### PROFESSIONAL EXPERIENCE

#### General Motors

##### Software Engineer

Oct 2020 – present  
Austin, TX

- Developed Ultra Compose, a web page builder and asset manager for marketing business partners, using React, Theme UI, Jotai, and React Query designed to improve web page turnaround time by at least 50%
- Designed lead generation forms to track interest for multiple vehicles and product reveals
- Prototyped, coded, and maintained Chevrolet's electric vehicle webpages [☑](#) using NextJS, Strapi, and Material UI to prove the efficiency increase gained by embracing newer technologies over more traditional methods of web development
- Coordinated with a third-party company to implement Adobe Analytics into the Chevrolet.com/electric [☑](#) website

##### Product Owner

Apr 2018 – Oct 2020  
Austin, TX

- Led IT and business discussions and feature creation for a major redesign of the Online Service Scheduling application reducing time to schedule appointments by 30%
- Devised multi-year strategic feature roadmaps for the Online Service Scheduling application
- Designed user stories based on business and customer requirements for the Online Service Scheduling application

##### Software Test Analyst

Jan 2016 – Apr 2018  
Austin, TX

- Optimized the Online Service Scheduling regression test suite to reduce duplicate and outdated tests and streamline regression testing resulting in a 20% reduced QA time
- Initiated and led the automation effort for Online Service Scheduling, resulting in improved turnaround time for QA release approvals

##### Test Automation Engineer

Jun 2015 – Dec 2015  
Austin, TX

- Automated manual test cases for various applications using C# and Selenium WebDriver, which reduced overall QA release testing time by over 30%
